Art Unit: 1774

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114.

Applicant's amendment filed on 07/22/02 (Paper No. 30), which amends claims 1, 2, 4-14, 16 and 17 and adds claims 32-35, has been entered. Claims 1, 2, 4-14, 16-18 and 20-35 are pending.

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1, 2, 4-14, 16, 17 and 32-34, drawn to a composition for forming a luminescent layer (claims 1, 2, 4-14, 16, 17, 32 and 33) and an organic element having a luminescent layer (claim 34), the composition classified in class 252, subclass 301.16.
- II. Claims 18, 20-31 and 35, drawn to a method for manufacturing an organic EL element by an ink-jet method (claims 18 and 20-31) and by discharging from a nozzle (claim 35), classified in class 427, subclass 66.

3. The inventions are distinct, each from the other because of the following reasons:

Inventions of Group I (with respect to the composition) and of Group II are related as product and process of use. The inventions can be shown to be distinct if either or both of the

Art Unit: 1774

following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the product as claimed can be used in a materially different process such as spin-coating or roll-coating.

Inventions of Group I (with respect to the organic element) and of Group II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make another and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product as claimed can be made by a materially different process such as spin-coating or roll-coating.

4. Because these inventions are distinct for the reasons given above, have acquired a separate status in the art as shown by their different classification, and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

5. Telephone calls were made to Eric Morehouse on 10/24/02 and 10/28/02 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1774

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

7. Any inquiry concerning this communication should be directed to Marie R. Yamnitzky at telephone number (703) 308-4413. The examiner works a flexible schedule but can generally be reached at this number from 6:30 a.m. to 4:00 p.m. Monday, Tuesday, Thursday and Friday, and every other Wednesday from 6:30 a.m. to 3:00 p.m.
